

ElcomSoft Offers a Special Discount for Government Institutions

Moscow, Russia – February 26, 2009 – ElcomSoft Co. Ltd., a leading provider of various password recovery solutions, announces the availability of a Special Order discount. The new discount program enables government entities, military branches, criminal investigation and law enforcement agencies, police and emergency services to order selected ElcomSoft password recovery products with a discount. The new 20% discount is in addition to any volume or bundle discounts already offered by ElcomSoft.

ElcomSoft equips law enforcement organizations and government entities with tools helping to combat computer-related crime. Cyber-crime and cyber-terrorism use latest and newest encryption methods to hide and protect information. ElcomSoft helps law enforcement to break into criminals' documentation in the fastest possible manner. "We are fully committed to fighting cyber-crime and cyber-terrorism," says ElcomSoft CEO Vladimir Katalov. "Making our products affordable to law enforcement and investigation authorities is our contribution to making the Internet a safer place," he adds.

Aiming to keep operating costs down, ElcomSoft developed technologies that extract super-computer performance out of ordinary, low-cost PCs. Combined with the Special Order discount, these technologies give law enforcement and government entities the most technologically advanced crime-solving tools at rock-bottom prices and highly affordable ownership and operational costs.

Participating Products

ElcomSoft recognizes the needs of forensic and law enforcement agencies, and structured its offer accordingly. Participating products include [Elcomsoft Password Recovery Bundle](#), [Elcomsoft Wireless Security Auditor](#), [Proactive Password Auditor](#), and [Elcomsoft Distributed Password Recovery](#); restrictions apply.

ElcomSoft password recovery tools give law enforcement, forensic and government customers the ability to decrypt files and data and unprotect entire hard disks protected with various passwords. The complete suite of ElcomSoft password recovery tools supports a variety of file formats (e.g. compressed archives, office documents etc.) and encryption methods. Incorporating state-of-the-art acceleration technologies such as the patent-pending [GPU acceleration](#) offering up to 50 times faster password recovery when certain ATI and NVIDIA video cards are present, password recovery tools offered by ElcomSoft are the fastest on the market, the easiest to use and the most affordable. Linear scalability on multiple CPUs and processor cores and thousands of networked workstations makes ElcomSoft password recovery solutions a strong contender.

ElcomSoft security audit tools help evaluate exactly how secure local and wireless networks are by attempting to break into the network within a limited timeframe. Network security audits are performed by attempting common attacks on various passwords in an attempt to take advantage of an exposed user account or gain access to a wireless network. Employing patent-pending hardware acceleration and zero-overhead scalability technologies used in ElcomSoft's password recovery tools, the company's security audit products are among the fastest and most cost-efficient network audit tools on the market, and allow performing super-computers grade attacks while employing inexpensive consumer-grade hardware.

About ElcomSoft Co. Ltd.
